

FROM ZERO HQ × TRADERLAB

We Didn't Buy More Traffic. We Fixed the System.

We didn't generate more traffic. We rebuilt the system that turns attention into paying customers — and scaled it across 10 countries in 90 days.

THE STARTING POINT

The Problem Wasn't Traffic. It Was the Wrong System.

€1,000 spent. €23 returned. The founder's own words are the most important evidence in this document.

FOUNDER EVIDENCE — DISCORD · 26 APRIL 2025

Loïs 26/04/2025 11:17

Hi there, I am going to make it short and make you understand what happened. Basically @ZeroFiat showed me some alarming KPIs yesterday and I understood that we were doing something wrong with our acquisition. We spent €1,000 on this last growth run and got back €23, so basically nothing. We got awareness and followers, but not the correct audience at all.

The only real sales we're seeing right now are a few affiliates asking for free subscriptions without actually driving paying users

"The issue wasn't awareness. It was attracting people who **never intended to become customers**. Traffic without a trust system is just noise."

DIAGNOSTIC FINDINGS

**WRONG AUDIENCE**

Growth spend attracted followers, not traders willing to pay.

**WEAK TRUST SIGNAL**

Brand positioning underdelivered relative to product quality.

**DESKTOP FRICTION**

Platform was desktop-first. Trader behavior was mobile-first.

**CREATOR ABUSE**

Affiliates extracted free subs without driving paying users.

**WEAK ACTIVATION**

No structured onboarding path from trial to paid conversion.

**NO FUNNEL ARCHITECTURE**

Traffic, registrations, and trials were not connected by design.

OUR ENGAGEMENT FRAMEWORK

PHASE 01**Diagnose**

Audit & root cause

**PHASE 02****Rebuild**

Brand, product, system

**PHASE 03****Launch**

Creator network live

**PHASE 04****Scale**

Optimize & compound

— PHASE 02 — REBUILD

Fix The Product Before Scaling Spend

Scaling a broken acquisition system produces more waste at higher cost. We fixed positioning, product, and distribution architecture first.

BRAND TRANSFORMATION

We weren't redesigning a logo. **We were reducing perceived risk.** For traders, trust is the product. A platform that looks unpolished signals that everything behind it might be equally unreliable.

PRODUCT & SYSTEM INTERVENTIONS

**Brand Repositioning**

Full identity rebuild to communicate premium trust and authority.

**Mobile-First Recommendation**

Identified desktop-first friction before data confirmed the gap.

**Activation Improvements**

Structured the path from free trial to paid subscription.

**Creator Network Built**

Replaced rogue affiliates with vetted, performance-tracked creators.

**Trust Infrastructure**

Social proof systems, community-led authority, and onboarding designed for conversion.

**Community Distribution**

X Spaces and live sessions replaced paid ads as the primary growth channel.

MOBILE ROLLOUT — DISCORD EVIDENCE · 05 JULY 2025

ZeroFiat 05/07/2025 15:28

We need amabassador like you to spread the word. With mobile roll out (hopefully on Monday), next week will be announcement release with video and features demo

stay ready

DEVICE BREAKDOWN — UNIQUE VISITORS BY DEVICE

Devices

Unique Visitors

 Mobile	69.0%	18,967
 Desktop		8,516

69% of all visitors arrived on mobile. *The recommendation preceded the data. We identified the product-distribution mismatch before user behavior confirmed it — that's what separates strategic diagnosis from reactive optimization.*

— PHASE 03 & 04 — LAUNCH & SCALE

Building The Acquisition Engine

Most agencies run campaigns. We built a repeatable system — creator recruitment, vetting, compliance, attribution, and weekly optimization operating as one machine.

CREATOR INFRASTRUCTURE PROCESS

- 01 Creator Recruitment**
Sourced creators with genuine trader audiences, not inflated follower counts.
- 02 Vetting & Qualification**
Verified audience quality, engagement rates, and demographic alignment.
- 03 Contracts & Compliance**
Performance-based agreements with clear attribution requirements.
- 04 Campaign Planning**
X Spaces, live sessions, community-led content — trust transfer at scale.
- 05 Creator Enablement**
Briefing, messaging frameworks, and conversion-oriented talking points.
- 06 Performance Tracking**
Attribution tracked per creator, per campaign, per conversion event.
- 07 Optimization Cycles**
Weekly review of conversion data to reallocate budget toward top performers.
- 08 Reporting**
Full transparency: registrations, trials, paid conversions, and revenue per creator.

DEMAND PROOF — DISCORD · 07 JULY 2025

 **Loïs** 07/07/2025 14:52
@everyone 📢 Trader Lab Update 📢 Wow, Trader Lab has been overwhelmed by your incredible support! 🚀 We've seen way more traffic than we ever anticipated, and our current server just couldn't keep up. We're actively upgrading to a more robust database service to handle this growth and ensure a smoother experience moving forward. This means the launch of our new mobile version will be slightly delayed, but we promise it'll be worth the wait! Thank you for your patience and enthusiasm—we're so grateful for this community! 🙏 #TraderLab

Can you make a X post with this info guys, thanks in advance

 1 

The problem evolved from **demand generation** to **infrastructure scalability**. Growth exceeded server capacity — the bottleneck had permanently shifted.

ACQUISITION CHANNELS — REGISTRATIONS BY SOURCE

Referrers	Channels	Source	Medium	Campaign	Term	Content	
Channels		Registrations					
Organic Social		36.9% 1,547					
Referral		1,307					
Unknown		756					
Direct		579					
Organic Search		7					

Organic Social + Referral accounted for 68% of all 4,196 registrations — zero paid ads.

PAID SUBSCRIBERS BY MARKET

Countries	Regions	Cities	Languages	Map
Countries		Paid Subscribers		
	Nigeria	216		
	United States	102		
	India	58		
	South Africa	46		
	United Kingdom	39		
	Philippines	27		
	Brazil	20		
	Kenya	14		
	Canada	10		
	Australia	6		

Market Insights

	Nigeria	216	Highest subscriber volume
	United States	102	Highest premium LTV
	India	58	Strong scalable demand
	South Africa	46	Emerging market growth
	United Kingdom	39	Premium audience segment
	Philippines	27	High engagement rate
	Brazil	20	Organic community growth
	Kenya	14	Emerging market signal

The acquisition engine scaled internationally **without geographic**

— BUSINESS IMPACT

Before the System. After the System.

Every intervention was a deliberate architectural decision — not a tactic, not a campaign, not a boost. A system designed to compound.

TRANSFORMATION SUMMARY

BEFORE — STARTING CONDITION		AFTER — 90 DAYS LATER
Buying traffic to a broken funnel	→	Building a repeatable acquisition engine
€1,000 spent, €23 returned	→	\$26,600 revenue in 90 days
Wrong audience, wrong intent	→	538 verified paying subscribers
Weak, untrustworthy brand	→	Premium positioning that commands trust
Rogue affiliates, no attribution	→	Vetted creator network with full performance tracking
Desktop-first, mobile-hostile	→	Mobile-first: 69% of visitors on mobile
Traffic only. No conversion system	→	17.81% trial-to-paid conversion rate
Single-market, single-channel	→	10 countries, multiple trust-led channels
Server could handle the demand	→	Growth exceeded server infrastructure capacity

"We didn't create a campaign.
We rebuilt the acquisition engine."
